

Stainless Steel Finishes

THERE ARE MULTIPLE FINISHES TO CHOOSE FROM FOR STAINLESS STEEL CORNER GUARDS. CHOOSE THE STAINLESS STEEL FINISH THAT MEETS YOUR WALL PROTECTION NEEDS.

- **Stainless Steel Finish - 2B No. 2B Finish**

This is the most common stainless steel finish for corner guards and wall protection. It is semi-reflective. It is commonly used for most food processing applications. It is easily polished to the final finish required.

- **Mirror No. 8 Finish**

This is a finish obtained by using successively finer sanding belts and then with lots of polish. Very expensive and what is most commonly used in store fixtures.

- **Stainless Steel Finish - 2B DA - Orbital Sand**

This is a finish obtained by using an orbital sander. It gives the material more of an artistic look. It is not uniform. Commonly used for countertops as it is very easy to hide large weld seams, does not show fingerprints as easily as the other finishes and is very easy to repair. Commonly used for countertops as it is very easy to hide large weld seams, does not show fingerprints as easily as the other finishes and is very easy to repair.

- **Finish - 4 No. 4 Finish (Brushed)**

This is a unidirectional finish obtained with a straight-line sanding belt. It is not highly reflective and is the most common finish for kitchen appliances.
