Paintable Vinyl Corner Guards – Installation Instructions

The paintable vinyl corner guards come pre-taped from the manufacturer with a 1/32" foam double sided tape with a permanent rubber-based adhesive.

Corner Guards with Double Sided Tape*

STEP 1
Ensure that the wall surface is dry and clean and free of any dust, dirt, loose paint, wax, oil, or grease by wiping with a solvent. Ensure that the cleaning solvent will not damage the finish on the wall surface.

STEP 2
If required, cut corner guard to required length, ensuring that all cuts are square and burr free.

STEP 3
Peel off backing tape from one wing entirely, then peel back the tape partially on the second wing. Place wing with the fully exposed tape to the wall, then remove the remainder of the tape backing from the second wing. Press firmly along the entire length of the corner protector to ensure a good bond.

Painting Steps

STEP 1
Clean the corner guard after installation to remove any dirt or dust using soap and water, then dry the corner guard. Note: Do not apply paint while the corner guard is still wet.

STEP 2
Prep the area around the corner guard making sure the area is clean and any surrounding areas that you do not want painted are covered or taped off.

STEP 3
Using a water-based paint, preferably with a high gloss finish (the high gloss finish will prevent scuffs and scratches from everyday wear from showing too much), using a stiff nylon paint brush paint the corner guard the desired color.
