

VINYL SURFACE-MOUNT CORNER GUARDS

Installation Instructions

Surface Mount Vinyl Corner Guards – Installation Instructions

Parts List

Aluminum Retainer

Vinyl Cover

End Caps

Mounting Hardware

Pre-Installation Notes

The use of back up channels at stud wall conditions is the factory recommendation. All anchors supplied by the factory should be checked to ensure that they are compatible the type of wall substrate on the project.

Installation Steps

STEP 1

Put the bottom end cap on the aluminum retainer. Then attach the retainer and end cap to the corner, ensure that the retainer is properly aligned with the corner.

STEP 2

Attach the retainer to the wall using the factory provided self drilling, self tapping screws. Begin at the bottom of the retainer and place in the screws accordingly in the factory pre-drilled screw slots, ensuring that the screws go through the metal backing stud.

STEP 3

In order to determine the proper height of the end cap, place the vinyl cover to the retainer and insert the top end cap. Please be aware that both the retainer and end cap have elongated screw holes that will allow for adjustment of the end cap to ensure a proper fit with the vinyl cover.

STEP 4

Position the vinyl cover over one side of the retainer, then using the palm of your hand push/snap the retainer into position over the other side of the retainer.

Cutting Surface Mount Corner Guards

Stock length material does not always have squared ends and may require squaring onsite. If space is available use a minimum 12' long cutting bench to allow the installer to cut the material without having to turn it around.

Storage & Handling

Store the finished corner guards in a clean and dry area. Material must reach 65° F. min to 75° F. max 24 hours prior to installation.

Cleaning Instructions

STEP 1

For best results, the use of liquid cleaners such as "409," "Fantastic," and "Mr. Clean," etc. are recommended. DO NOT use powder cleansers as they can leave difficult to remove residue.

STEP 2

Do not use chlorinated or aromatic hydrocarbons, esters, or ketones to clean TheCornerGuardStore vinyl products. Avoid the use of heavy degreasers, compounds containing surfactants, and abrasive compounds or cleaning devices.

Caution

DO NOT walk on the corner guards.

DO NOT store anything on top of the corner guards.
